# Oil Products

## Service overview

*Led by Robert Campbell, the Oil Products service provides comprehensive coverage of the global oil products markets with separate reports for light ends, middle distillates and fuel oil markets.*

*The publications provide data analysis, market fundamentals and geopolitical comment, and discuss underlying developments and future trajectory in these traded markets. Reports include price forecasts and information on refining margins, making them relevant for anyone working with oil products.*

### Light ends outlook

This monthly report analyses the fundamentals underpinning gasoline and naphtha. Spanning global supply and demand factors, it offers insight into price determination. Each region is covered with main indicators (individual country demand, supply, inventories and trade flows) for products, as well as price forecasts, historical refining margins and data on turnarounds. The report covers all the information relevant to these complex markets.

*Published monthly (12 per annum). Format: PDF*

### Light ends regional

This report accompanies the Outlook and drills down in granular detail into the key indicators of demand, supply, trade, inventory and prices for these products by region—Asia Pacific, Middle East and Africa, Europe, FSU, North America and Latin America—to give the reader insight into a complex area.

*Published monthly (12 per annum). Format: PDF*

### Middle distillates outlook

This report covers the important factors in North America, Europe, Asia, Latin America, the FSU, the Middle East and Africa, that will influence supply and demand going forward. With an outlook for these integral products, used both in transportation and heating, the publication provides complete analysis and insight into the market.

*Published monthly (12 per annum). Format: PDF*

## Middle distillates regional

This report accompanies the Outlook and drills down in granular detail into the key indicators of demand, supply, trade, inventory and prices for these products by region—Asia Pacific, Middle East and Africa, Europe, FSU, North America and Latin America—to give the reader insight into a complex area.

*Published monthly (12 per annum). Format: PDF*

## Fuel oil outlook

Covering global supply and demand factors, this monthly report on the fuel oil sector provides analysis of the developments that will affect the market and future prices, with particular focus on the East of Suez (Asia and Middle East) and FSU. It includes critical indicators for each region, price forecasts and refinery data, and commentary on market drivers.

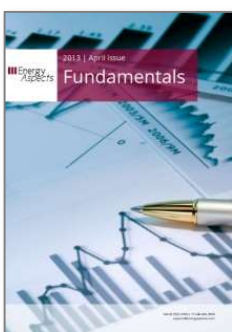

*Published monthly (12 per annum). Format: PDF*

## Fuel oil regional

This report accompanies the Outlook and drills down in granular detail into the key indicators of demand, supply, trade, inventory and prices for these products by region—Asia Pacific, Middle East and Africa, Europe, FSU, North America and Latin America—to give the reader insight into a complex area.

*Published monthly (12 per annum). Format: PDF*

## Fundamentals

This monthly report covers all data releases from the last month, including China, the US, FSU, India and the Middle East. It offers an overview of supply and demand, as well as inventories and prices. Its analysis of trends and themes makes it an essential guide to the fundamentals of the oil market.

*Published monthly (12 per annum). Format: PDF*

## Data review

Data reviews explore supply and demand data by country or key agency reports, combining the latest data releases with extensive models. Data reviews provide an instant update on important data releases: key agencies' forecasts, US Department of Energy, US oil and shale output, US demand and trade, Canada, OPEC, Middle East demand, China, India, Australia, Japan, South Korea, Europe, Norway, the United Kingdom, Russia and FSU, Brazil, and Mexico.

*Published weekly (DoE) and monthly (all others). Format: PDF*

## Weekly Oil Products Update

This weekly email alert summarises our views on the product markets and notes any significant changes from our last monthly views.

*Published weekly (50 per annum). Format: Email*

## E-mail alerts

E-mail alerts offer a short summary of important developments as they happen, together with any effect on balances and our market outlook. Examples of topics that could be covered include Euroilstocks data releases, refinery outages and turnaround schedules, East/West arbs, product trade flows, short-term changes in regional product balances and their impact on prices and spreads.

*Published frequently (100+ per annum). Format: E-mail*

## Key Themes – Monthly Slideshow

Key Themes provides our outlook for the development of crude oil and oil products markets in a pdf slideshow format. The slides are easy to assimilate and available for use by clients in internal and external presentations (with due accreditation to Energy Aspects).

*Published monthly (12 per annum). Format: PDF Online*
